Introduction

The purpose of this webquest is to teach what a ratio, rate, unit rate, and proportion is. Also, this webquest will show you how to use those terms.

Tasks

Today you will discover all about ratios, rates, unite rates, and proportions.

Process

Click on all of the tabs on the left and complete your worksheet as you go. Make sure you click on all of the links too.

Teacher Page

This webquest contains information from my unit on ratios and proportions. I found websites via searches. I created the worksheet myself.

Standards

Credits

Other

What is a ratio?

What is a rate?

What is a unit rate?

What is a proportion?

Evaluation

Let me know what you thought of this activity.

Category and Score	Bad	Okay	Good	Very Good	Score
Ratios	Would like something different. 0	I lived with it. 1	It could be a little better. 2	It different and I liked it. 3	?/3
Rates	Would like something different 0	I lived with it. 1	It could have been a little better. 2	It was different and I liked it. 3	?/3
Unit Rates	I would like something different 0	I lived with it 1	It could have been better 2	It was different and I liked it 3	?/3
Proportions	Would have liked something different 0	I lived with it 1	It could have been a little better 2	It was different and I liked it 2	?/3
				Total Score	

Conclusion

Make sure your Ratio and Proportion paper is filled out completely and be ready to hand it in tomorrow for a grade.
