### Introduction

Your school has been taken over by poor nutrition and they need your help. As the school's nutritionist, you are required to research and develop an example healthy eating plan for the school. The information will be displayed in an informational website and will answer the question: "What is healthy eating?"

### Tasks

1. Research a food group 2. Evaluate two websites. 3. Create a blog at Blogger.com 4. Create a website using Microsoft Publisher 5. Enter researched information as the content of your website. 6. Insert images 7. Insert links 8. Test run website 9. Publish site 10. Evaluate and provide feedback.

### Process

### Evaluation

Category and Score					Score
See handout for rubric					%25
					%25
					%25
					%25
				Total Score	%100

### Conclusion

Congratulations!!! You have created a website that has helped save our school from poor nutrition. You should feel really proud of yourself. Now your mission will be to maintain your website and to answer any questions that maybe asked of you. Goodluck.

### Teacher Page

The following unit is an integrated unit. The English, HPE and ICT year 5 Essential learnings were consulted in the design of this webquest. Please before using the webquest read through each of the steps to be sure that all your learners will be able to succeed. Some of the terms may need to be discussed with students so that the language of the webquest is understood.
