As you begin to learn about the Holocaust, reflect upon the above photograph, a somber reminder of the pain inflicted on millions of innocent people. This woman bears a tattoo, a number which was once used to dehumanize her upon arrival at a concentration camp. Millions of individuals received the same tattoo during the Holocaust, an ever present scar etched upon the arms of survivors.

Learning about the Holocaust should not be taken lightly. The following articles will help you understand the vocabulary associated with the Holocaust. You will also see photographs of individuals and artifacts as you move forward. This is not a time to laugh, mock, or make jokes. Remember, the individuals you learn about were people - children, friends, siblings, students - just as you are. Honor their memory by learning their story.

Conclusion

Across the world many memorials are dedicated to the memory of those who lost their lives during the Holocaust. The New England Holocaust Memorial in Boston is one of many examples (pictured above). Six tall, glass towers rise amongst surrounding buildings. Inscribed in the glass are 6 million numbers - representing the tattoos which were inscribed on many victims’ arms. Located in Washington, D.C. is the United States Holocaust Memorial Museum. The USHMM website has been crucial in the creation of this WebQuest. Yet their online resources are far from the experience of visiting this living memorial in person. Through powerful exhibits, first-hand accounts, and artifacts from the Holocaust, USHMM inspires individuals to put an end to hatred and genocide permanently.

“And yet, when I look up at the sky, I somehow feel that everything will change for the better, that this cruelty too shall end, that peace and tranquility will return once more” - Anne Frank, July 15, 1944
