

## I Feel Special When I Teach

**WebQuest Description:** This WebQuest will enable the students to learn about their body parts: names and functions.

**Grade Level:** K-2

**Curriculum:** Science

**Keywords:** Body parts, activities, songs, pictures, videos, games, and powerpoint

**Published On:** 2015-05-16 18:27:26

**Last Modified:** 2015-05-18 15:21:45

**WebQuest URL:** <http://zunal.com/webquest.php?w=284526>

### Introduction

The Human body is an amazing machine where the parts work together to do a task or daily activity. Therefore; it is very important for the children to learn about their body as the followings: The names of their body parts, The functions of the body parts, The importance of the body parts, Which parts of the body needed to do a certain activity..

### Tasks

The children will do the followings: To do the printable activity worksheets related to the Body parts. Use Sticky note to write and stick on your peer's body names and the functions of the body parts. With your parent help, draw your best friend or (family member) body-sized poster; and write & talk about his/her body parts related to his/her favorite activities

### Process

Task 1: Print out the activities worksheets attached in this page (you may ask teacher help to print). Task 2: Choose your class peer. With your peer, use many colorful sticky note (green, pink, yellow, orange..etc). Enlarge your handwriting for the name of the body part. Under the name, write with smaller font size full sentences of the function of that body part. Stick those sticky notes in the right places of your peer body. Task 3: (with parent help) Bring paper roll. Cut it in a way that fit the length and the width of your best friend or family member. Ask him/her to lay over the paper spread on the floor. Draw using a marker the figure of his/ her body. Ask him/her to get up. Draw some details (face, hair, eyes, mouth, hands, fingers, toes, t-shirt, pants..etc) Write on the different body parts (on your drawing) used by him/her to do favorite activities; for examples on the ears (listening to the music) Glue your drawing on the foam board as a poster. Write the name of him/her on the top of the poster. Talk about your best friend or family member in the class.

### Evaluation

Page Reset

Category and Score	Poor (1pts)	Fair (2pts)	Good (3pts)	Very Good (4pts)	Score
Recognition: Student can recognize and identify parts of the body when shown pictures.	Student could not recognize any body part when shown pictures.	Student was unable to recognize 5 body parts when shown pictures without cuing provided by the teacher.	Student could recognize 5 & above common body parts when shown pictures.	Student could recognize most (if not all) body parts taken when shown pictures.	
Explanation: Students can use sentences to tell body parts functions	Student could not give sentences for any body parts functions	Student was unable to give sentences on 5 body parts functions when shown pictures without cuing provided by the teacher.	Student could give sentences on 5 & above common body parts functions when shown pictures.	Student could give sentences on most (if not all) of the body parts functions taken when shown pictures.	
Participation: Students level of participation and attentiveness during the course of the lesson (Read aloud and group activities)	Student was not able to focus on lesson without constant guidance and redirection.	Student required moderate support and supervision to focus on the lesson.	Student was able to focus on lesson and perform group activities with minimal guidance.	Student was able to focus on lesson and perform group activities without guidance.	

Category and Score	Poor (1pts)	Fair (2pts)	Good (3pts)	Very Good (4pts)	Score

## Conclusion

Coming To The End...!!!When the children are done, they will become much in the followings:  
 Awareness of their own body  
 Body parts when shown as (pictures)  
 They will recognize names of their body parts  
 They will enrich their science  
 vocabularies.  
 More self-confidence when talking about their abilities  
 They can give full sentences of functions of their body parts  
 Which parts of the body needed to do certain activity

## Teacher Page

I recommend teachers, students, and even parents to go through this WebQuest to help them achieve the goals planned when teaching children "Their Body Parts". The elements such as (videos, songs, powerpoints, word files, games, pictures, activities..etc) provided in this WebQuest will enrich their knowledge, skills, & self-awareness. So, don't hesitate to benefit from all of these.

### Standards

This WebQuest will be helpful for students around the world to have information needed to have better understanding of their Bodies. Since they have Themes and units related in their School curriculum, it is a good opportunity to use technological tool such as WebQuest for such science unit.

We in Saudi Arabia as one of the modern countries are glad to search for tools that make teaching & learning easier and better.

### Credits

Special Thanks To:

Dr. Ghada Awada who devoted her self to teach us how to use such an amazing application technology tool in our school.

Ms. Faten Ataya to provide for us such a chance to add for more success in teaching methods.

My colleagues who made the mission of creating WebQuest enjoyable, successful, & achievable.

### Other

You're welcome anytime to visit My WebQuest..!!!
