## Introduction

Hello, Michel and I (Snyper) made this web quest to show you the fundamentals of a programming web site named Scratch. Scratch is a drag and drop code website (See drag drop page for more). It was made/created by MIT (Massachusetts Institute of Technology). Its free to use and create an account. You can follow people and work on group projects, they even feature projects daily. These projects are hand picked and show some of Scratches best programers works.

## Tasks

1:To make an account.2:learn/get familiar with drag and drop coding and sprites.3:To make a working program. (It can be just having one thing happen EX:A sprite move ten steps)4:To make a program with 3 fundamentals such as, movement, accomplishing something, and working, of course!
