Introduction

Hello Zoologists! Endangered animals need your help! We need to save them from becoming extinct. You are going to choose one endangered animal species to learn about and teach others how they can help save them from becoming extinct! Put on your zoo thinking caps! It is time to go on a Webquest to help us find facts about endangered animals!

Tasks

Your job is to learn about ONE endangered animal. By the end of the Webquest, you will be able to answer these questions: What animal did you choose? Where does your animal live? What does your animal eat? What are some fun facts about your animal? Why is your animal endangered? What can we do to help? Go through this quest to find the answers and write down the answers on your sheet!

Process

1. Read to find out why animals become endangered; 2. It's time to choose an endangered species and learn more about the animals! Click the link below to find a lists of endangered animals. Choose one animal and write the name on your sheet. Click on the animal and read the facts to answer the questions on your sheet; 3. Here are some more links if you want to do more research on your animal! Make sure you become an expert on your animal only, for now!; 4. Once you are done with your research sheet, watch Cosmo's World below to learn about how animals become endangered. You can also watch one or two of the other videos to see pictures of animals that are endangered or close to becoming extinct!

Evaluation

Great zoologists *strive for accuracy* and make sure they have all of the information complete! 1. Are all of the questions on your research sheet answered? If not, go back to the process and click on the links to find the answers! 2. How do you want to share what you learned with others? Look at the pictures below to help you think about what you want to create!
