WebQuest URL: <http://zunal.com/webquest.php?w=316024>

Introduction

Class today you will be learning about learning theories. These three in particular: Constructivism Behaviorism Multiple Intelligences

Tasks

Copy and Paste each link and read about these three learning theories: Constructivism: <http://www.thirteen.org/edonline/concept2class/constructivism/>; Behaviorism: <http://www.understanding.com/theory/behaviorism/>; Multiple Intelligences: <http://www.institute4learning.com/resources/articles/multiple-intelligences/>;

Process

So what is Cognition? It is the process of thinking. Everyone can learn but usually in their own ways it is easier for them to learn. Theorists have been trying to pinpoint the different ways students work. Behaviorism is how you learn to behave. In this there are stimuli used to teach you, for example, you perform a task correctly, then I give you candy like the video. Same goes for misbehavior so, but you would receive a punishment. I learned a lot by this method growing up. Social Cognitive? It is the idea that by watching others and interacting with them you learn.

Evaluation

SHORT ESSAY Now explain what you have learn and understand about the three terms we have gone over in this webquest. (10 pts) Create a 3 Column Chart: title each column with one of the theories we learned about in this webquest. In the columns, write what the theories represent, definition, listing stages or Intelligences.

Category and Score	1-2 points Meets none to little	2-3 pts Meets required	4-5 pts Exceeds Expectations		Score
Grammatically correst					
Makes good factual statements					
Venn diagram is filled out and has thoughtful ideas					
				Total Score	

Conclusion

When you are done, place your paper in the tray and sit quietly or find something to do while everyone else finishes. Once everyone is done, we will discuss what we have learned.
