**WebQuest URL:** <http://zunal.com/webquest.php?w=364681>

### Introduction

Millipedes are a group of arthropods that are characterised by having two pairs of jointed legs on most body segments. They are known scientifically as the class Diplopoda.

### Tasks

Create a presentation on PowerPoint with all the information about the Millipedes. Include a short video related to the topic in your presentation. The presentation should not be shorter than 3 minutes and it may not be longer than 5.

### Process

1. Research the information about millipedes on this website. <https://en.m.wikipedia.org/wiki/Millipede>  
2. Create a Powerpoint with the summarized information you learned on here.  
3. Include images about the millipede and their species.  
4. On one slide compare the differences between the millipede and centipede. (Include images and facts.  
5. On one slide include the behavior of this species in detail.  
6. Finally explain why this animal is different than other animals and why it is so unique and explain all its characteristics.

### Evaluation

from 1 to 10.

Category and Score					Score
				Total Score	

### Conclusion

Once you are done with the presentation slides, they will be presented in November 21st. The best presentation will win a surprise award. Send your presentations to the following email, [mauricio.baiz@divinesavioracademy.com](mailto:mauricio.baiz@divinesavioracademy.com) and you will get your grades back. Finally, be prepared to take a quiz about the family of arthropods on November 22nd.
