

## Assignment 1

**WebQuest Description:** In this Webquest we will be investigating how to exchange money for goods.

**Grade Level:** K-2

**Curriculum:** Business / Economics

**Keywords:** Money, time, goods and services

**Published On:**

**Last Modified:** 2018-09-17 15:40:03

**WebQuest URL:** <http://zunal.com/webquest.php?w=388773>

### Introduction

Imagine that you have just won the lottery! You have \$150 to spend at the mall. You are in need of three new t-shirts and four new pairs of shorts, but you are allowed to spend the money however you want!

### Tasks

In order to collect the rest of your winnings, you must create a Powerpoint with how you plan to spend your first \$150 at the mall. Your task is to use internet research, economics, math, and Powerpoint skills to create a presentation on how you plan to spend the money.

### Process

### Evaluation

You will be graded based on the rubric below. The rubric features the following categories: visual, content, presentation, and originality. To ensure the best possible grade, please be sure that you are on topic with your presentation and that your Powerpoint contains original information that is relevant to the topic of this project. To access the rubric, click the link below entitled Project Rubric.

Category and Score					Score
				Total Score	

### Conclusion

In this WebQuest, you have learned how to manage a budget and balance wants with needs. You have presented your 'purchases' to the class. Did you manage your wants and needs effectively by purchasing everything required? Please be sure to download the certificate of completion below.
