Introduction

Your goal is identify the uses of the five senses of the body.

Tasks

Your job is to distinguish and familiar with the five senses and its uses from the video presentation.

Process

1. Watch the video about the five senses.2. Now that you know about the five senses of the human body, you and your classmates are going to color and cut out the five senses picture provided by the teacher and glue it to the outside of a paper bag. When the bags are finished, you are going to direct your attention to the teacher as he/she holds up a community helper figure. Identify what the five sense does and raise your hand as you identify the picture provided.

Conclusion

Five senses of the human body play important role, the sense of sight, smell, taste, touch, and hearing, humans also have the sense of balance, pressure, temperature, pain, and motion. These various new senses all work together and may involve the coordinated use of the sense organs. The sense of balance is managed by a complicated network of various body systems. Any quick change to any of the five senses can cause the feeling of dizziness or unsteadiness.

Teacher Page

The goal of this WebQuest is intended for the first grade students to identify the five senses of the human body and its functions. The students will have the opportunity to learn the importance of the five senses of the human body.
