Introduction

Could you tell me the name of animals that you know? I know that you will probably answer my question easily. Animals live around us, we are so familiar with some kind of animals. We treat them as a pet. We love them. We feed them. Someday, our pets will give birth their next generation, their population is getting bigger. But do you know that unfortunately there are several animals are threatened of being extinct. These pictures below will show you some endangered animals that we must protect! click here to see the pictures

Process

ENDANGERED ANIMALS
Komodo: The Komodo is endangered. It is a very large reptile that lives on a few small islands of Indonesia. It is endangered because people are hunting it.
Orangutan: Orangutan are the world's most intelligent animal other than humans. They use their fingers and toes to grip onto branches. The population of orangutans is decreasing because people have destroyed their habitat by hunting.
Rhinoceros: The rhinoceros is critically endangered. The rhino is prized for its horn. Rhinoceros have thick skin, acute hearing and sense of smell, but poor eyesight. They eat leaves.
Polar Bear: Polar bear is a bear nature to arctic ocean and its surrounding seas. Global warming is the most significant threat to polar bear primarily because the melting of its sea ice habitat reduces its ability to find food.
Koala: Koala is herbivore native to Australia. It has a thicker coat, large ears and large limbs. Koala was hunted for its fur.
For other references you can check the several links that I have shared with you below: click here! we need to protect these animals you better check this out. When the links are not enough, you can watch the video below: <https://www.youtube.com/watch?v=FsX71DHVO8k>

Tasks

Part A (Direction : Answer these questions according to the description)
1. Q : Why do people hunt elephants? A :
2. Q : Why do people kill koala? A :
3. Q : Why does panda need a lot of food? A :
4. Q : Do you know rhinoceros? Why do people kill them? A :
5. Q : Why is orangutan endangered? A :
Part B (Direction : Match the words with the descriptions)
1. Polar Bear
a. herbivore and native to Australia
2. Komodo
a. often grips onto branches
3. Orangutan
a. native to arctic ocean
4. Rhinoceros
a. reptile
5.

Koala has thick skin and valuable horn

Evaluation

EXCELLENT
 GOOD
 FAIR
 BAD
 Notes :- If students get perfect score / answer 10 questions correctly they will be in excellent column.- If students get more correct answers than the wrong ones they will be in good column.- If students get the same amount of correct and wrong answers they will be in fair column.- if students get more wrong answers than the correct one they will be in bad column.

Conclusion

This is the end of our material. As an author, I hope this material will be useful for you. And I hope that this WebQuest brings new knowledge for those of you who have read this lesson till this part, it means so much to me! By reading this as one of your preferences to study, I also hope that this will make you realize that many of animals are threatened of being extinct, and our job is to keep and protect them. Last but not least, don't ever stop learning cause you become what you study!

Teacher Page

Standards

I have put a few links on the other tabs of this WebQuest, also a video to be watched by students. This WebQuest is made to fulfill the assignment task from our lecturer as Mid-term test score.

Credits

I would like to thank to the writer of the book that i use as one of the sources for this webquest, this book is taken from the English Course in Depok. I would like to thank to my lecturer, Ms Euis Kurniasih for giving me this opportunity and guidance to build this WebQuest on my own.
