Introduction

The Atari 2600 was the first game console ever created for home use. It consisted of one game, Pong. Throughout the years, new models were created that allowed the user to switch the game they wanted to play at their pleasure.

The Playstation 3(ps3) was only created about 2 years ago. However, it is no surprise that it has already surpassed all other gaming systems including the Xbox 360. It has many games to choose from and many features. Some of these features are:

Ability to connect to the internet

Play Blu-Ray Movies

Play on a HD tv through a HDMI cable

Connect with friends online in games and other applications

Tasks

Your task as high school students is to find 5 things you did not know about the Atari. However, you must also find 5 things you did not know about the Playstation 3. Record each thing you find out about and if possible find more than 5 for each game console.

Process

Read all of the instructions below before beginning.
Have a MS Word document open and ready to use.

Open your internet browser and go to www.google.com You may start with either the Atari or Playstation 3.

Find a website with a good amount of true info, and look for a fact you did not know.

Record all your facts. Your document should be at least two pages; one page for Atari and one page for Playstation 3.

Also insert a picture of the console and accessories for each gaming system.

Copy and paste the links to the websites where you found your information for each console into your Word document.

Save your file as: yourfirstinitial last name GAME RESEARCH (EXAMPLE: kwilliamsGAME RESEARCH);

Submit the file to the drop box folder: GAME RESEARCH

Evaluation

Evaluate yourself on how you think you did. Base the evaluation on how long it took you to find all the information, how interesting the info is, and how difficult it was to find it.

Submit the evaluation as a journal in MOODLE . The journal is located on the main MOODLE page beneath your assignment for today.

Category and Score					Score
				Total Score	

Conclusion

Now that you know more about the differences between the Atari and the Playstation3, you can go out and educate the world.

Teacher Page

For some kids, it is hard for them to do a research paper on a boring subject. Many students would be interested in doing this research paper. Try it and you might be surprised.
