Introduction

Hello Boys and Girls, My name is Addison and I am having trouble with my addition and subtraction. I was hoping that you guys could learn to add and subtract so you could teach me how.

Tasks

Like I said before, what I need you guys to do is learn to add and subtract so you can teach me how. I found a video for you to watch, a couple games for you to play, and some worksheets. I hope ya'll understand it better than I do.....

Process

1. First I need you to watch the short video on addition and subtraction, and take the short quiz.
2. Next I have some fun games for you to play with pictures showing you the concept behind addition and subtraction.
3. Then I need you to complete an addition and subtraction worksheet to turn into me.
4. Finally to make sure you understand and you can help Addison learn, I need you to get into groups of four and make up your own worksheets using pictures of objects you find in magazines or newspapers. You will need to cut them out and glue them on construction paper to make number sentences. Be sure you fill in the answers for Addison, so she can see exactly how it's done. Be sure to be neat with your worksheets. Addison will need one addition problem and one subtraction problem for you to get full credit.

Evaluation

Category and Score	4 points	3 points	2 points	1 point	Score
Watching the video and taking the quiz.	You get all four points by getting all four questions correctly on the short quiz.	You get three points by getting three of the four questions correctly on the short quiz.	You get two points by getting two of the four questions correctly on the short quiz.	You get one point for getting one of the four questions correctly on the short quiz.	
Addition Worksheet	You will get all four points by completing the addition worksheet with 100% accuracy.	You will get three points by completing the addition worksheet with 75% accuracy.	You will get two points by completing the addition worksheet with 50% accuracy.	You will get one point by completing the addition worksheet with 25% accuracy.	
Subtraction Worksheet	You will get all four points by completing the subtraction worksheet with 100% accuracy.	You will get three points by completing the subtraction worksheet with 75% accuracy.	You will get two points by completing the subtraction worksheet with 50% accuracy.	You will get one point by completing the subtraction worksheet with 25% accuracy.	
Student's worksheets	You will be given four points for a worksheet that is very neat and organized. The worksheet must have at least one addition problem and one subtraction problem with the correct answer on all problems.	You will get three points for a completed worksheet that has at least one example of addition and one subtraction problem.	You will get two points for a worksheet that has either an addition problem or a subtraction problem with the answer being correct.	You will get one point for a worksheet that has either one addition problem or one subtraction problem with the answer not being correct.
