

- Catchy, clever and relevant.
- Easy to Navigate
- Logical and engaging
- Somewhat easy to navigate.
- Understandable
- mostly logical
- Minimally engaging.
- Irrelevant or inappropriate content.
- Vague and unclear design
- Content & Use of Technology for Research
- Content is creative and original
- Research on states is in depth
- Resources are appropriate and useful to final project design and implementation
- Mostly accurate and current information is delivered.
- clean use of technology
- Resources are somewhat useful to final project design and implementation
- Inaccurate and/or non-current Information is delivered.
- Poor use of technology
- Resources are not that useful to project design and implementation
- Project
- Demonstrates a command of the material
- Shows research and strong insights/analysis
- Demonstrates a working knowledge of the material
- Shows some research and insights/analysis
- Not proficient understanding of the material
- Little research or insights/analysis

Conclusion

Using technology to enhance your learning is not only fun, but also an important skill. Every opportunity for technology to be present in lessons will strengthen skills and understanding of not only content, but of product. This webquest gives students time to explore a region of the United States that may be unfamiliar to them. Not everyone is able to travel extensively, by using the internet students are able to "travel to via the web", learn about, and perhaps someday visit these states and enjoy seeing in real life what they were learning about in their classroom.

Teacher Page

This webquest is a final project for a technology class which is part of a master's program I am currently enrolled in. Earlier in the year, another course I took exposed me for the first time to webquests. An opportunity to put one together had not been available until now. I spent countless hours perusing a variety of webquests and have credited two below that gave me the format/style for mine. The variety of webquests available are endless and inspiring. This webquest should take approximately two weeks from start to finish. Most importantly, as I tell my students all the time we have to become comfortable with using technology and this is my first example!
